# Where we are.

When you become a student at Canterbury Christ Church University you will study at one of our three distinctive and unique locations in Kent and Medway.

This area of the country is a gateway to both the UK and Europe, which is easily reached either by train or sea ferry.

All our campuses are less than an hour away from London by high speed train, where a number of large international airports offer flights to every corner of the globe and will make arriving with us nice and straightforward.

Whichever course you choose, you'll find an environment that motivates, stimulates and inspires your studies.

As a World Heritage Site, Canterbury is one of the country's 'must see' destinations. You'll be studying right at the heart of this great student city, with its historic streets, ancient city walls, cosy pubs, exciting clubs and top-class restaurants. And, of course, you'll be within walking distance of one of the most beautiful cathedrals in the world.

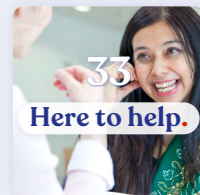

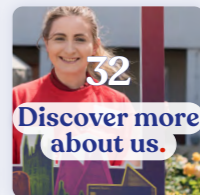

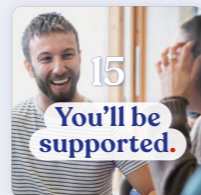

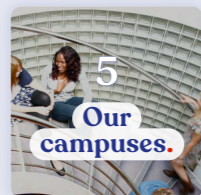

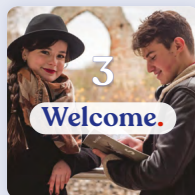

The Medway Campus is close to the historic naval town of Chatham and Rochester, with its beautiful cathedral. The campus itself is in an area known as Chatham Maritime, where major developments have created a student-friendly quarter with a real village atmosphere. Here you'll find a multiplex cinema, a shopping centre and a fully equipped sports centre. London is under an hour away by train.

Our Salomons Institute for Applied Psychology is in Tunbridge Wells, known as Royal Tunbridge Wells it is one of a few towns and boroughs in England to officially be given a royal title. Situated in an area of Outstanding Natural Beauty, it sits amid rolling hills, ancient woods and open heaths. It is well served by public transport and London is under an hour away by train.

Studying in Canterbury is one of the best choices that I have ever made! I love the history associated with the city and how I can always find something new and interesting to do along the high street. Everyone that I met was very friendly and welcoming, especially the professors at Christ Church who took a personal interest in helping me in any way they could with my studies. Most importantly, I made so many great memories with life-long friends, and I have Christ Church to thank for that!

# Canterbury Campus.

We're proud to be part of a World Heritage Site and although we're in a busy, cosmopolitan city with a rich programme of festivals and culture, the sea, fields and woodlands are on our doorstep.

We offer great facilities at our Canterbury Campus. Students can step out into a vibrant and world-famous cathedral city and also benefit from a campus with excellent learning and teaching resources, music venues, a superb sports centre,

a well-stocked bookshop and plenty of coffee bars and places to eat. Our multi-million-pound investment over the last decade on new and renovated buildings is part of our commitment to providing a first-class student experience.

## With fantastic new buildings, facilities and courses, our city campus is transforming.

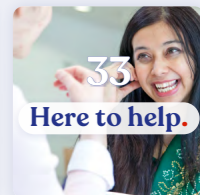

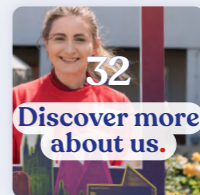

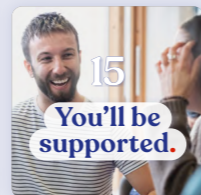

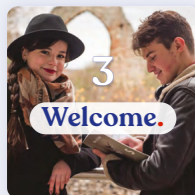

In the heart of our main campus is a major high-tech facility for science, technology, health, engineering and medicine. Supporting careers and skills for the next generation of engineers, scientists, healthcare professionals and doctors, this exceptional centre of excellence is opening

up exciting new opportunities for students and graduates.

The building opened in 2021 and is only a short distance away from our new creative arts facility on the campus – all part of a £150m transformation plan.

The city campus is also home to the Kent and Medway Medical School, a collaboration between Canterbury Christ Church University and the University of Kent.

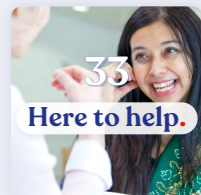

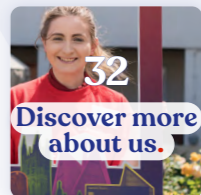

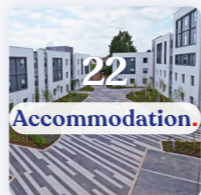

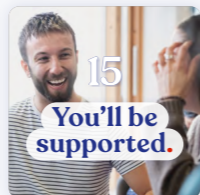

But we don't just focus on the sciences at Christ Church. Our creative arts building, named after music pioneer Daphne Oram, is dedicated to 21st century creativity and digital innovation, and has become a hub for arts and culture in the city. There are dedicated facilities for music, performance, games design, media, photography and graphic design. You'll be able to showcase your work and talents in a building designed to reflect contemporary working practices in the digital age.
