

Police Drug Diversion (PDD)

A realist impact, process and economic evaluation

Collaboration, Manualisation and Theory of Change

CCPR - 18th January 2024

Nadine Hendrie, Dr Helen Glasspoole-Bird & Prof Alex Stevens

Centre for Policing Research
and Learning

University of
Kent

Police Drug Diversion Project

PDD - National Evaluation of police drug diversion schemes

The PDD project is a £1.8 million project funded by the Cabinet Office, Evaluation Accelerator Fund (EAF).

Started Sept 2022 – ends March 2025

Police Drug Diversion – defining terms

Diversion:

- Away from the criminal justice system
- Towards education and treatment
- For drug involved suspects at pre-arrest or pre-charge (scheme dependant)

Definition of harm: how we use it

PDD as 'harm reduction policing'

'Adoption of evidence-informed policies and practices which aim to reduce the adverse health, social and economic consequences associated with drug use, drug markets, and with efforts to control them through the criminal justice system.'

(Definition adapted from Bacon (2023). From criminalisation to harm reduction? The forms and functions of police drug diversion in England and Wales. *Policing and Society*)

Realist evaluation: useful for decision makers, evaluations need to identify **'what works in which circumstances and for whom?'**, rather than merely 'does it work?' (Pawson & Tilley)

Realist evaluation aims to identify the underlying generative **mechanisms that explain 'how' the outcomes were caused and the influence of context.**

Why the PDD Evaluation ?

The effects of PDD on crime, health, and public spending have not been evaluated in the UK.

Similarly, there is no research on the cost-consequences of PDD for different service providers and government departments, or an assessment of its impact on equalities.

The evaluation of PDD schemes has been recommended by various bodies, including

- The Advisory Council on the Misuse of Drugs
- The Commission on Race and Ethnic Disparities
- Dame Carole Black's Independent Review of Drugs
- From Harm to Hope 10-year drug strategy
- Harm reduction and public health approaches in policing
- Reform to adult out of court disposals framework

“We will become world-leading in our approach [to drugs], with evidence-led and data-driven interventions, and a commitment to build the evidence base where necessary”

USER VOICE

Work Packages

WP1: Description & Manualisation

- **Initial theory of change**
- **Intervention description**

WP2: Process evaluation

WP3: Outcome evaluation

WP4: Cost consequence analysis

WP5: Equity assessment

WP6: Realist synthesis

Research Questions

What other effects do PDD schemes have (e.g., on wellbeing of individuals, families and communities)?

What are the effects of PDD schemes on health outcomes (measured using hospital data, and drug treatment entry and retention)?

What are the effects of PDD schemes on offending (as measured by reconviction)?

What are the cost-consequences of PDD schemes for health, police, and other service providers?

Are there inequalities in the use of PDD schemes (e.g., on grounds of ethnicity, gender, levelling-up)?

Data Collection

Descriptive: Police diversion schemes

Qualitative: interviews

- Diversion Partners
- OPPC
- Police (various ranks)
- Drug involved suspects
- Support organisations - health

Quantitative:

- OHID – MOJ, NHS, NDTMS

Purpose WP 1

Fidelity

Test framework
for other WPs

Inform coding
map

Inform interview
focus

Process - collaborative

map

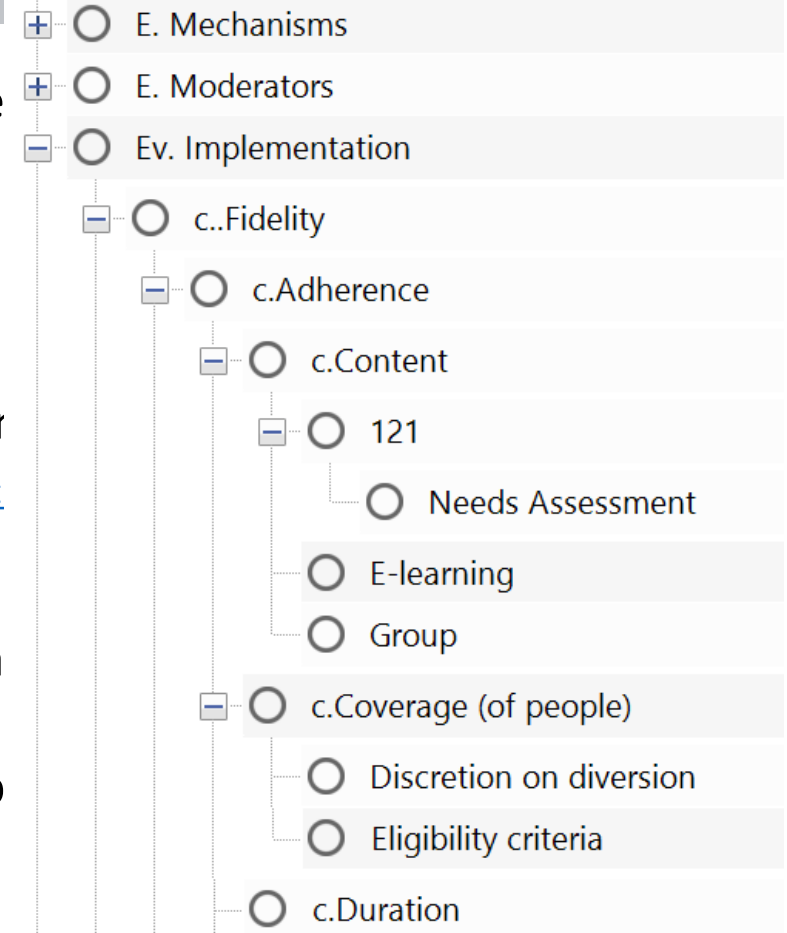

Inform interview
focus

Process evaluation: Qualitative and quantitative research in the implementation fidelity and uncover the mechanisms by which PDD

Conceptual frameworks used for implementation fidelity.

EMMIE: Effect, Mechanisms, Moderators, Implementation and Ecor interventions or families of programmes (Johnson et al., 2015). [About framework | College of Policing](#)

VICTORE: Volition, Implementation, Contexts, Time, Outcomes, Rival al., 2020) Adherence: Content, coverage, frequency, duration and m (intervention complexity, facilitation strategies, quality of delivery, p

Process - collaborative

TIDieRs

Workshops

Stakeholder meeting

Received TIDieR descriptions from three schemes

Area workshops to interrogate and clarify the TIDieR

Area workshops to interrogate and clarify the TIDieR

All informed:

- the detailed description of implementation
- provided a comparison for fidelity of implementation
- manualised how the intervention is implemented in each area

Protocols answered TOC, to judge fidelity and inform practice.

What is the TIDieR+ framework ?

Tidier+

(Hoffmann et al., 2014)

Template for Intervention Description and Replication

Project name	Delivery dates	Eligibility criteria
Capacity	Referral pathway	The scheme
Added value	Partners	Delivery locations
Personalised	Materials	Modifications
Delivery	Economic costs	1;1 & Group Sessions info

Process - collaborative

TIDieRs

Workshops

Stakeholder meeting

In-person workshops x 3

Stakeholders included

- Police officers/various ranks
- Police managers
- Staff and managers of the agencies DIS are diverted to
- User Voice
- Local partner agencies
- NHS liaison and diversion services
- Public health substance misuse lead officials.
- Home Office /Cabinet Office

National stakeholder workshop.

Presented revised scheme descriptions for all three focus areas.

Important: This event provided all stakeholders the opportunity to agree the revised theory of change and their area scheme description.

Differences and similarities across the schemes

Process evaluation: additions to note:

- Triage or pre assessment
- Support after the scheme

Characteristics of Police Drug Diversion schemes			
	Thames Valley	West Midlands	Durham
Stage			
Pre-arrest			
Pre-charge			
Eligible offenders			
Simple possession			
Cultivation (personal)			
Other offences			
Diverted to			
Online course			
Face-to-face course			
Elearning package			
One-to-one: one-off			
One-to-one: ongoing			
Payment			
Offender pays			
Free to offender			
Non-compliance			
Not eligible in future			
Refer back for decision			
Prosecute for original offence			
Recorded as			
Community resolution			
Conditional caution			
Repeat offences			
Escalate to conditional caution			
Multiple opportunities			
Caution/charge

TVP addendum: a real time product – evolving

Framework for WPs to assess implementation fidelity and uncover the mechanisms by which PDD delivers its effects.

Revised Theory of Change informed by a rapid review of literature published between 2018 and 2023.

Agreed by researchers and stakeholders as a viable working framework.

Informs the Economic evaluation.

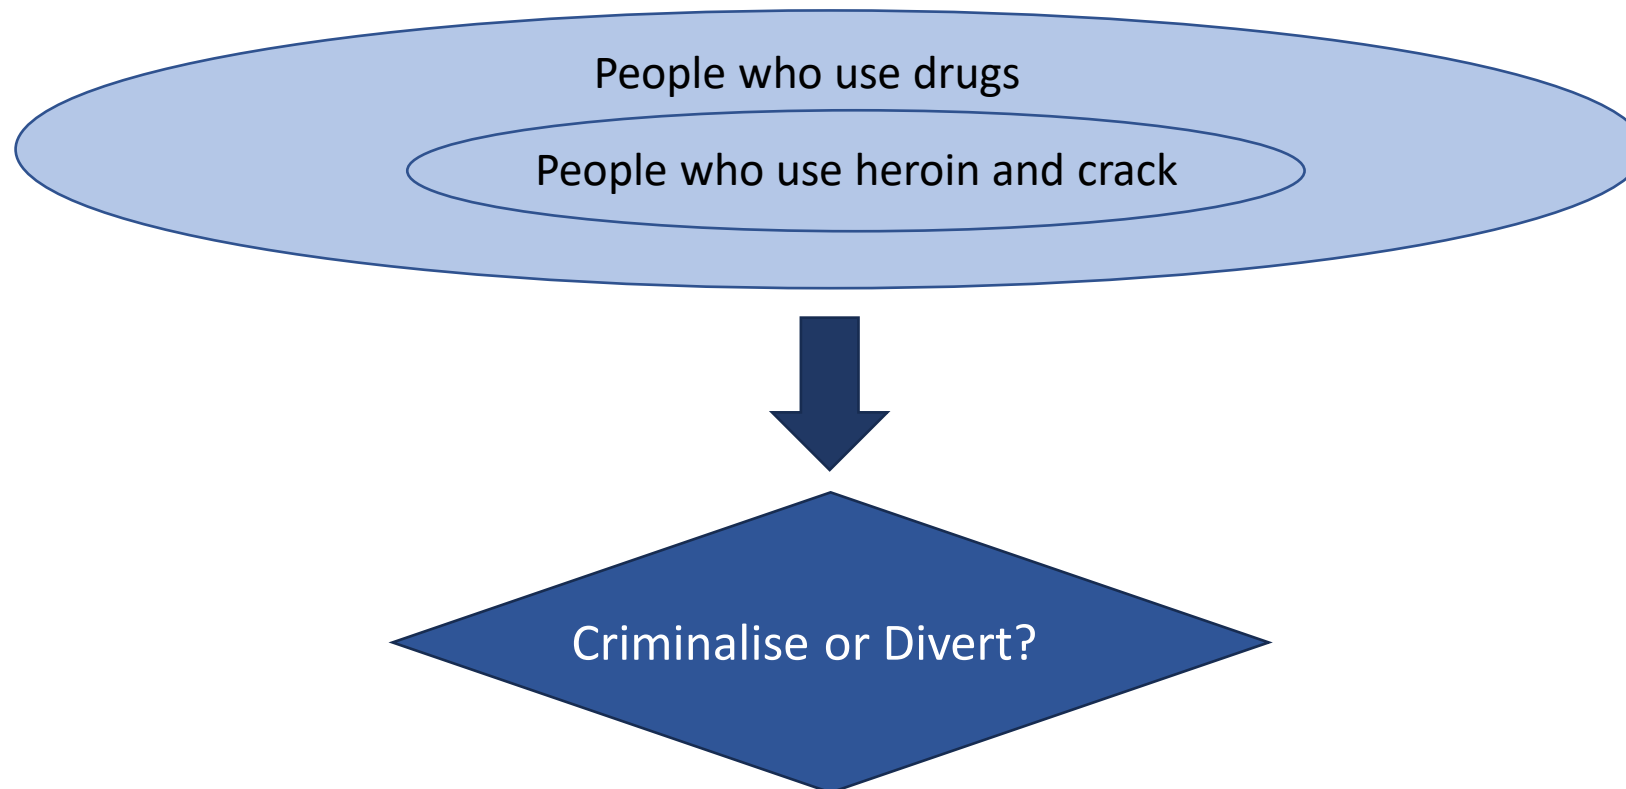

Theory of Change informed by [Stevens et al. \(2022\)](#)

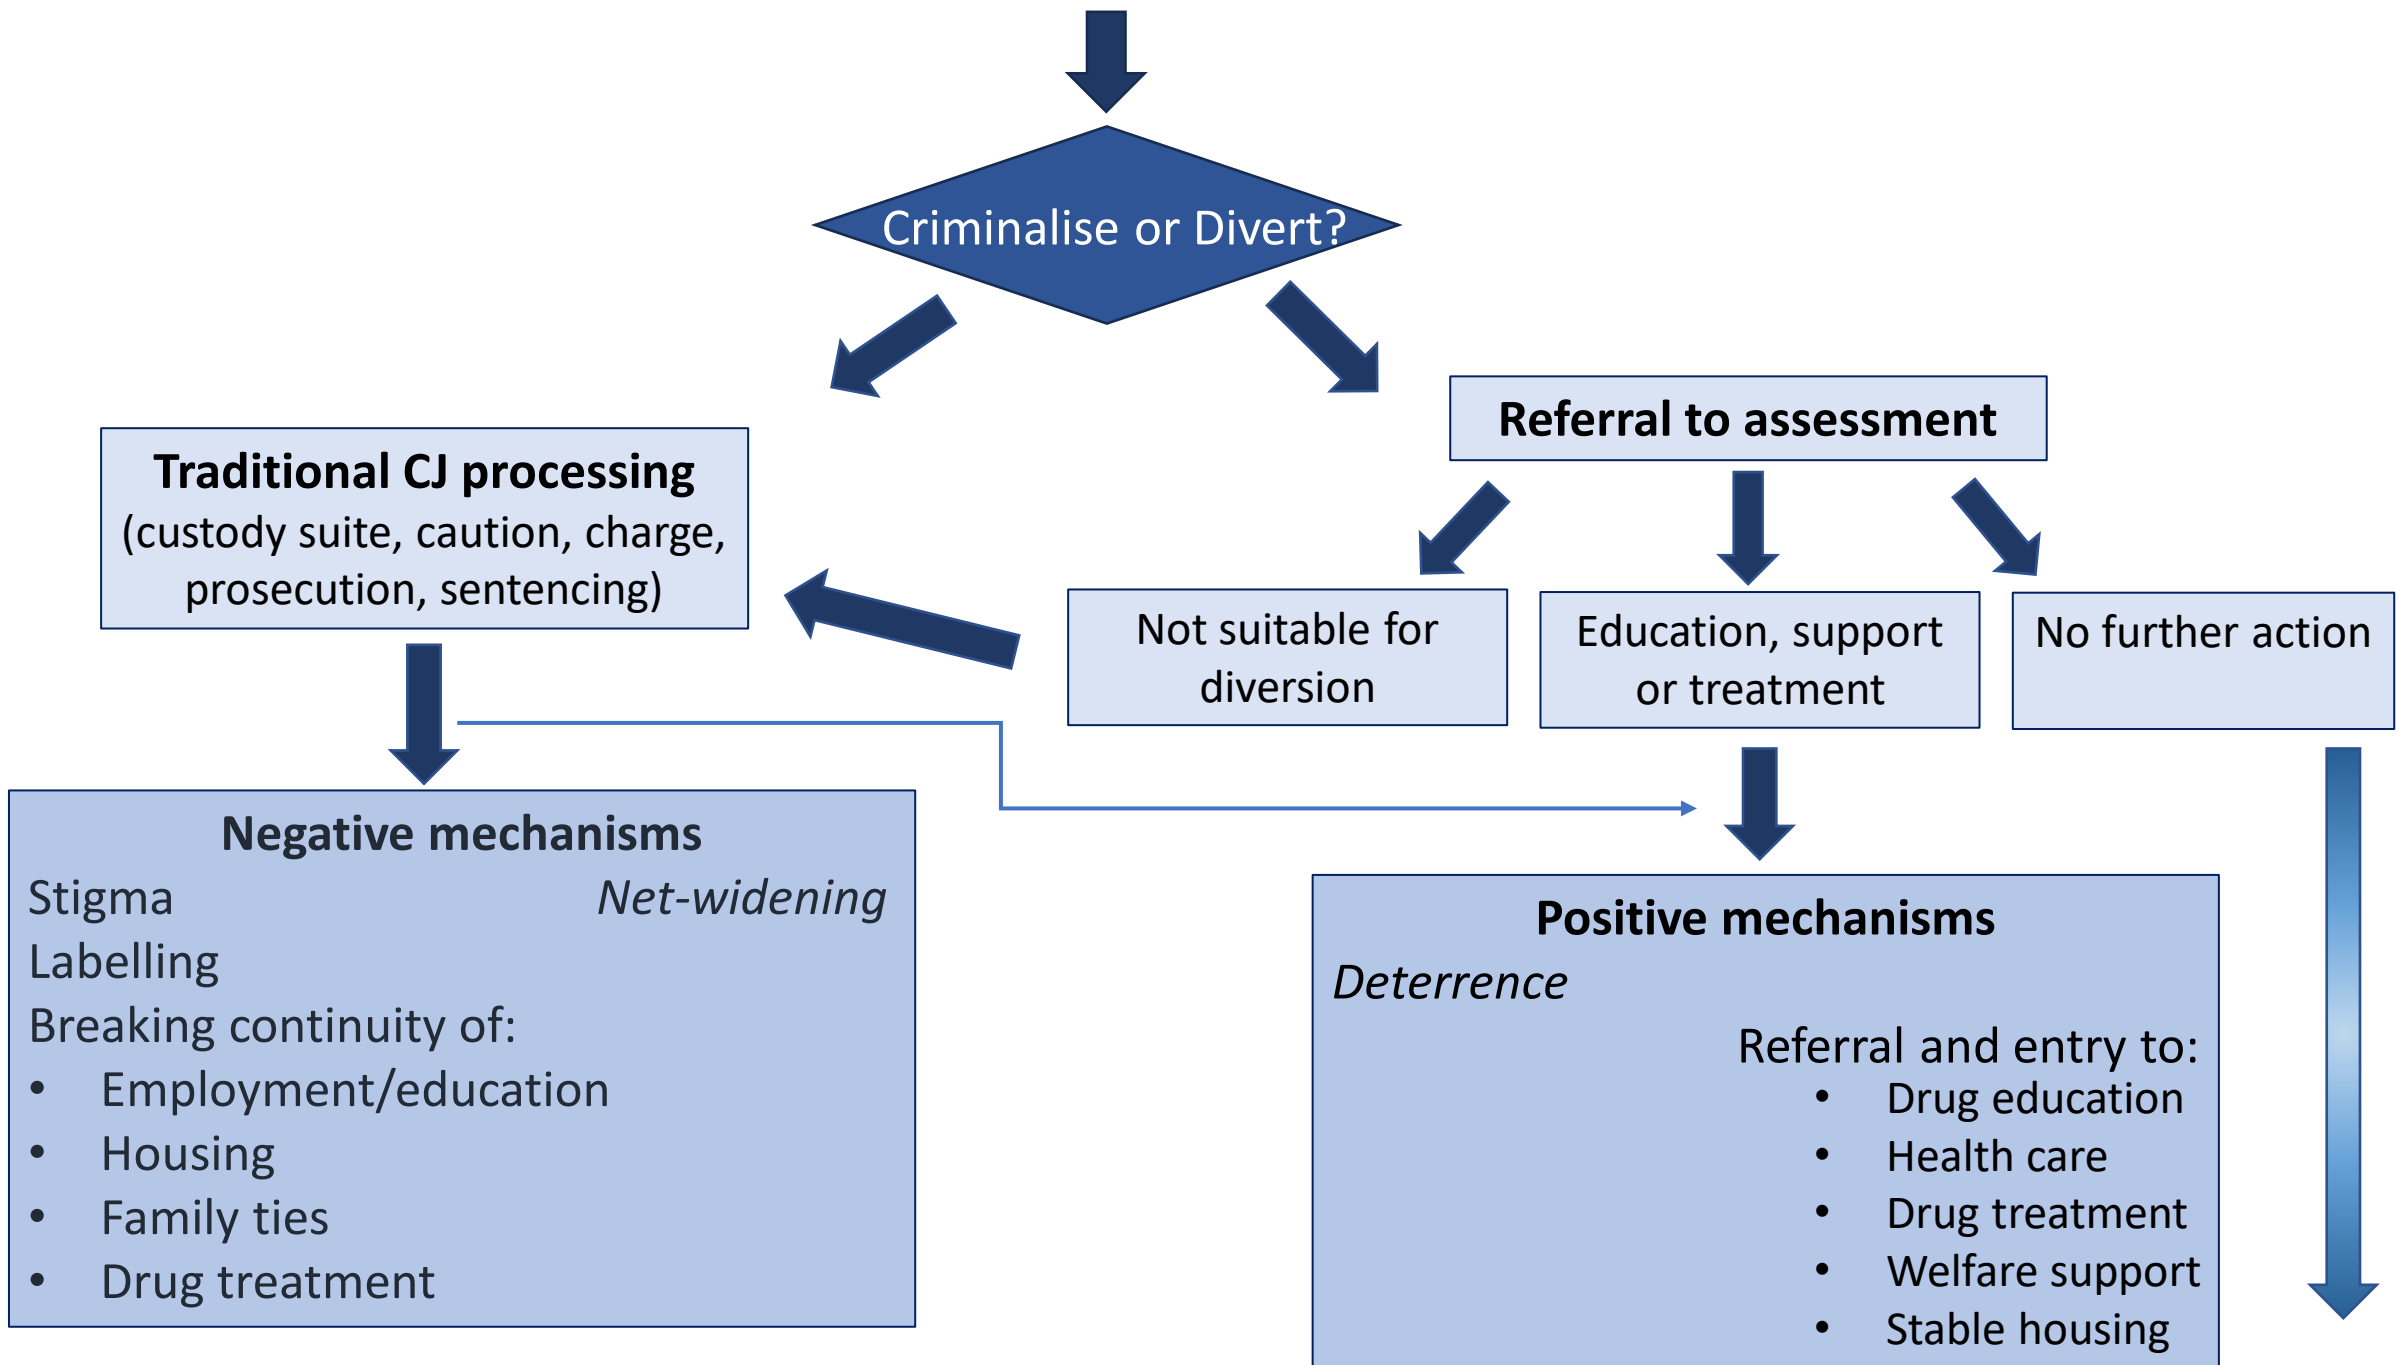

Contexts

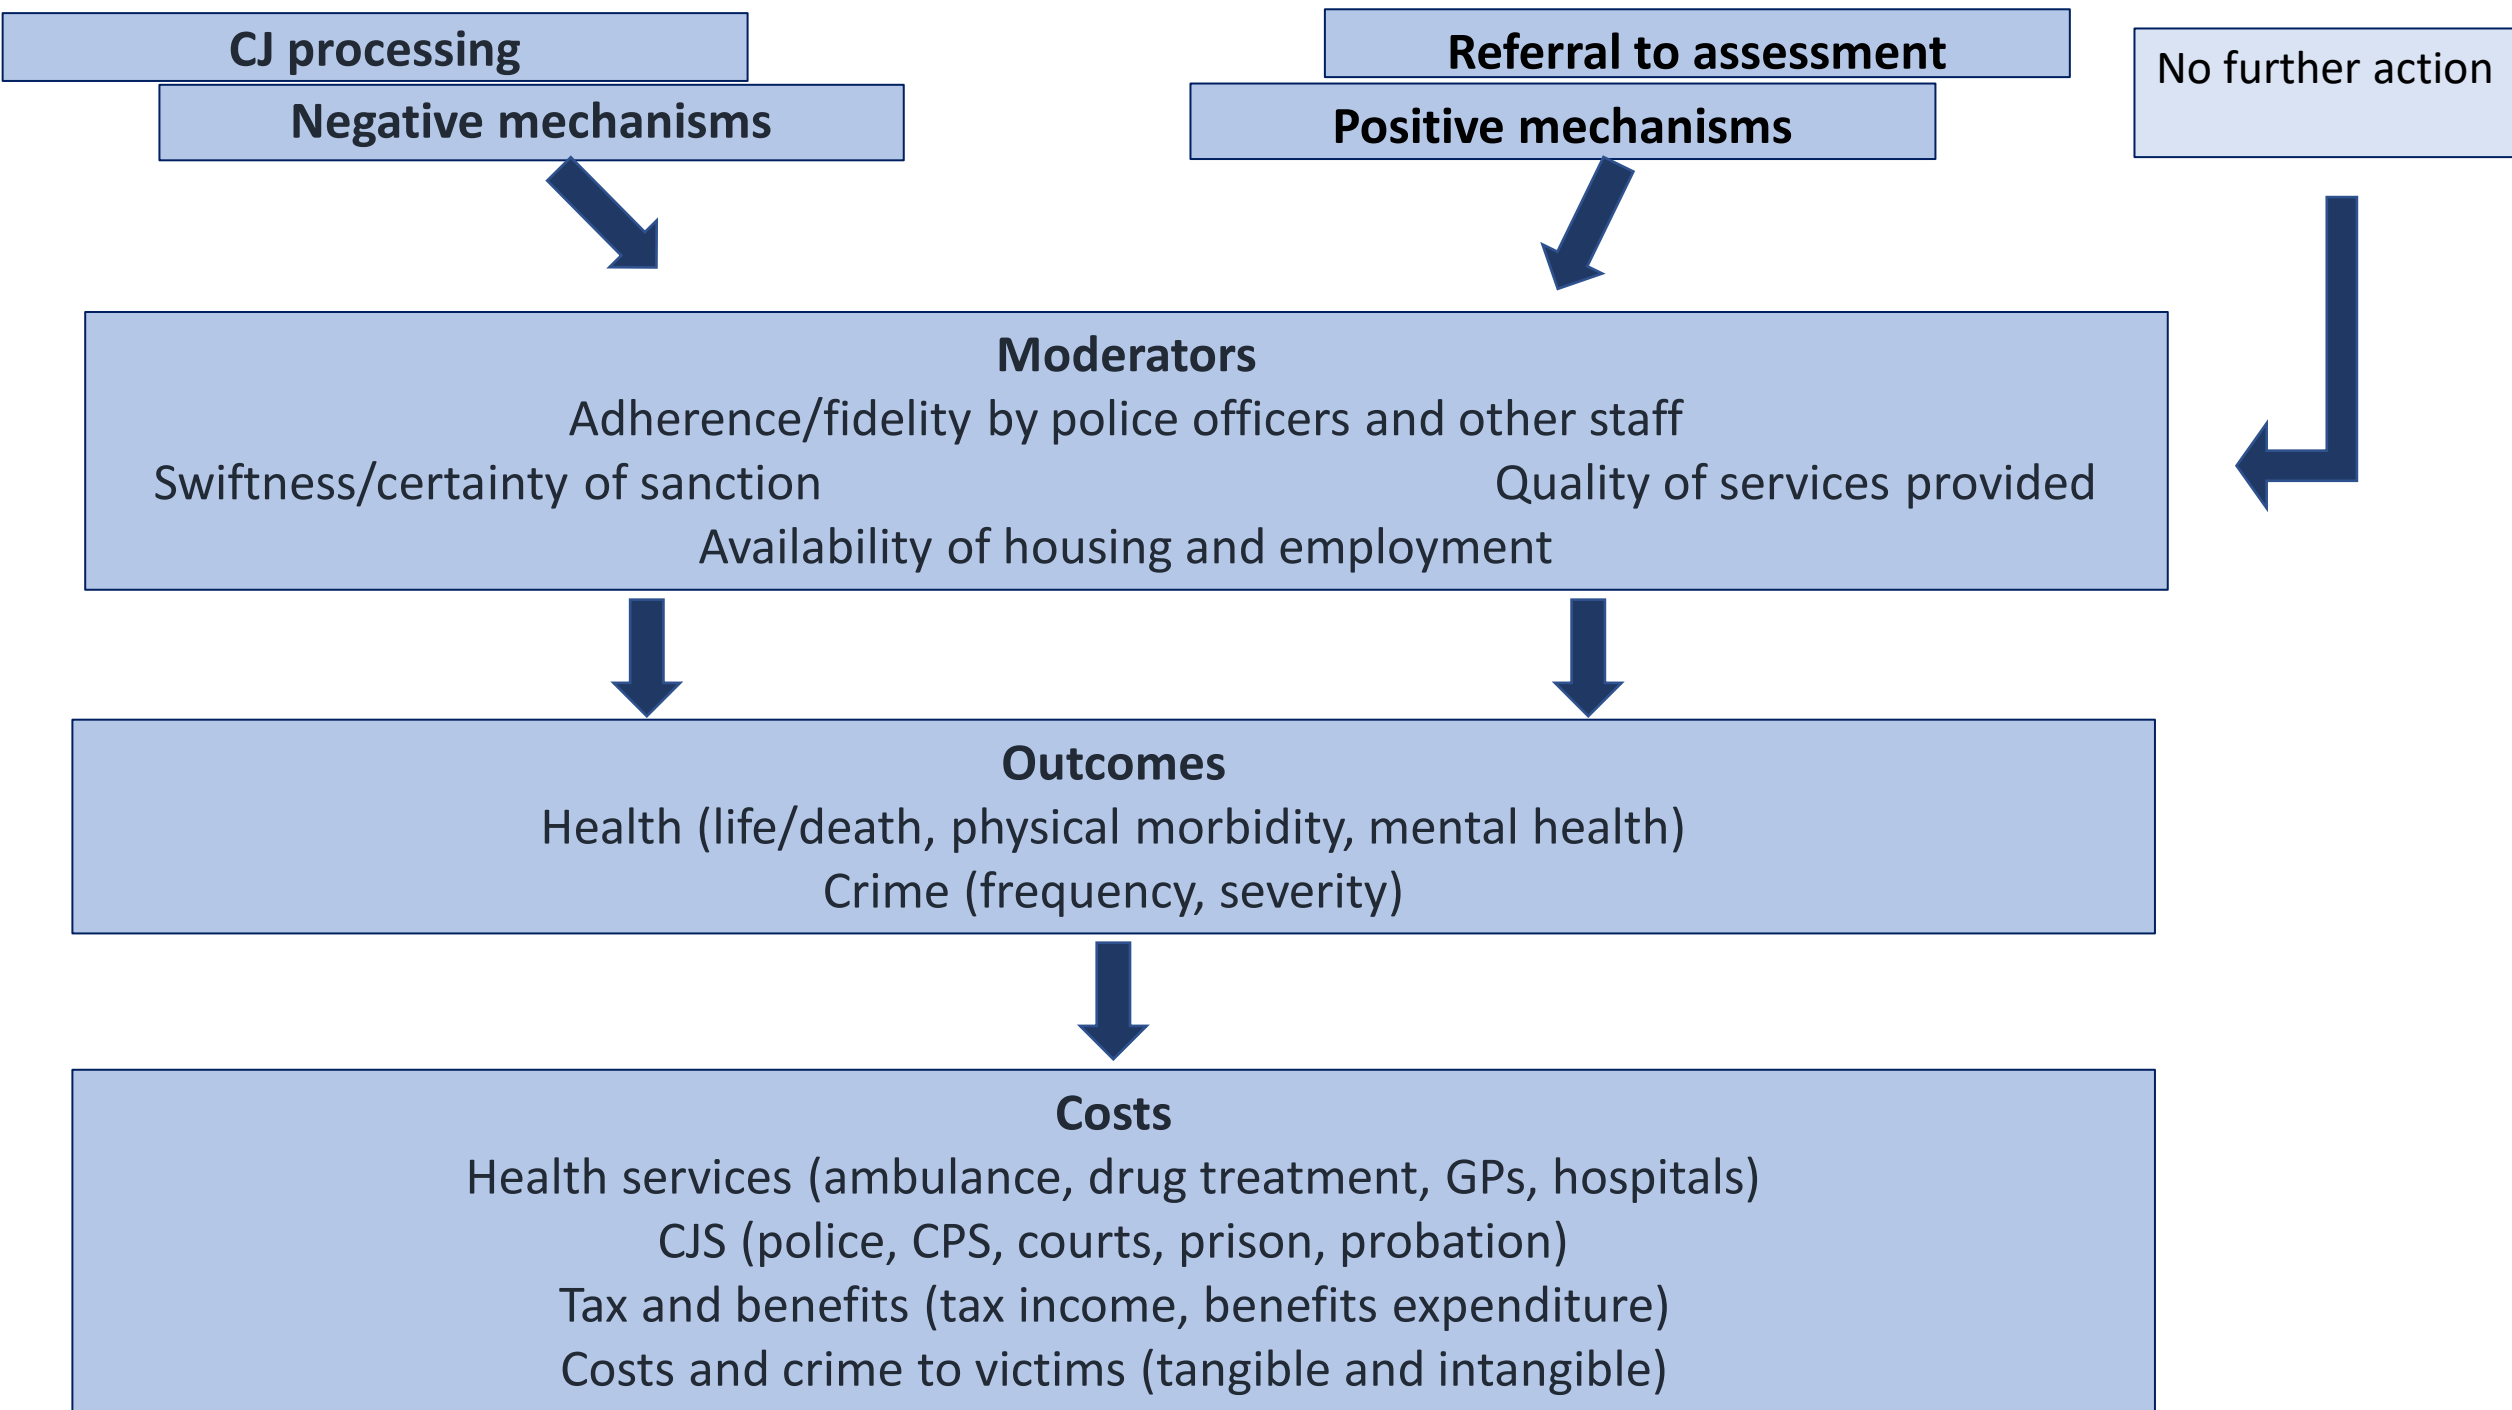

Area: health inequalities, crime opportunities, available treatment, urban/rural

Health service and CJS: primary care, drug treatment, policing, sentencing

Individual: poverty, trauma/ACE, previous experiences of substance use and policing

Literature review
(Stevens et al., 2022)
Updated review (Stevens
& Glasspoole-Bird, 2023)

Workshops in each of the
three Police force areas

REFINING THE THEORY OF CHANGE

Informs other work packages

Provides a working theory which
will be refined again at the end of
the research project

Theory of Change – revised

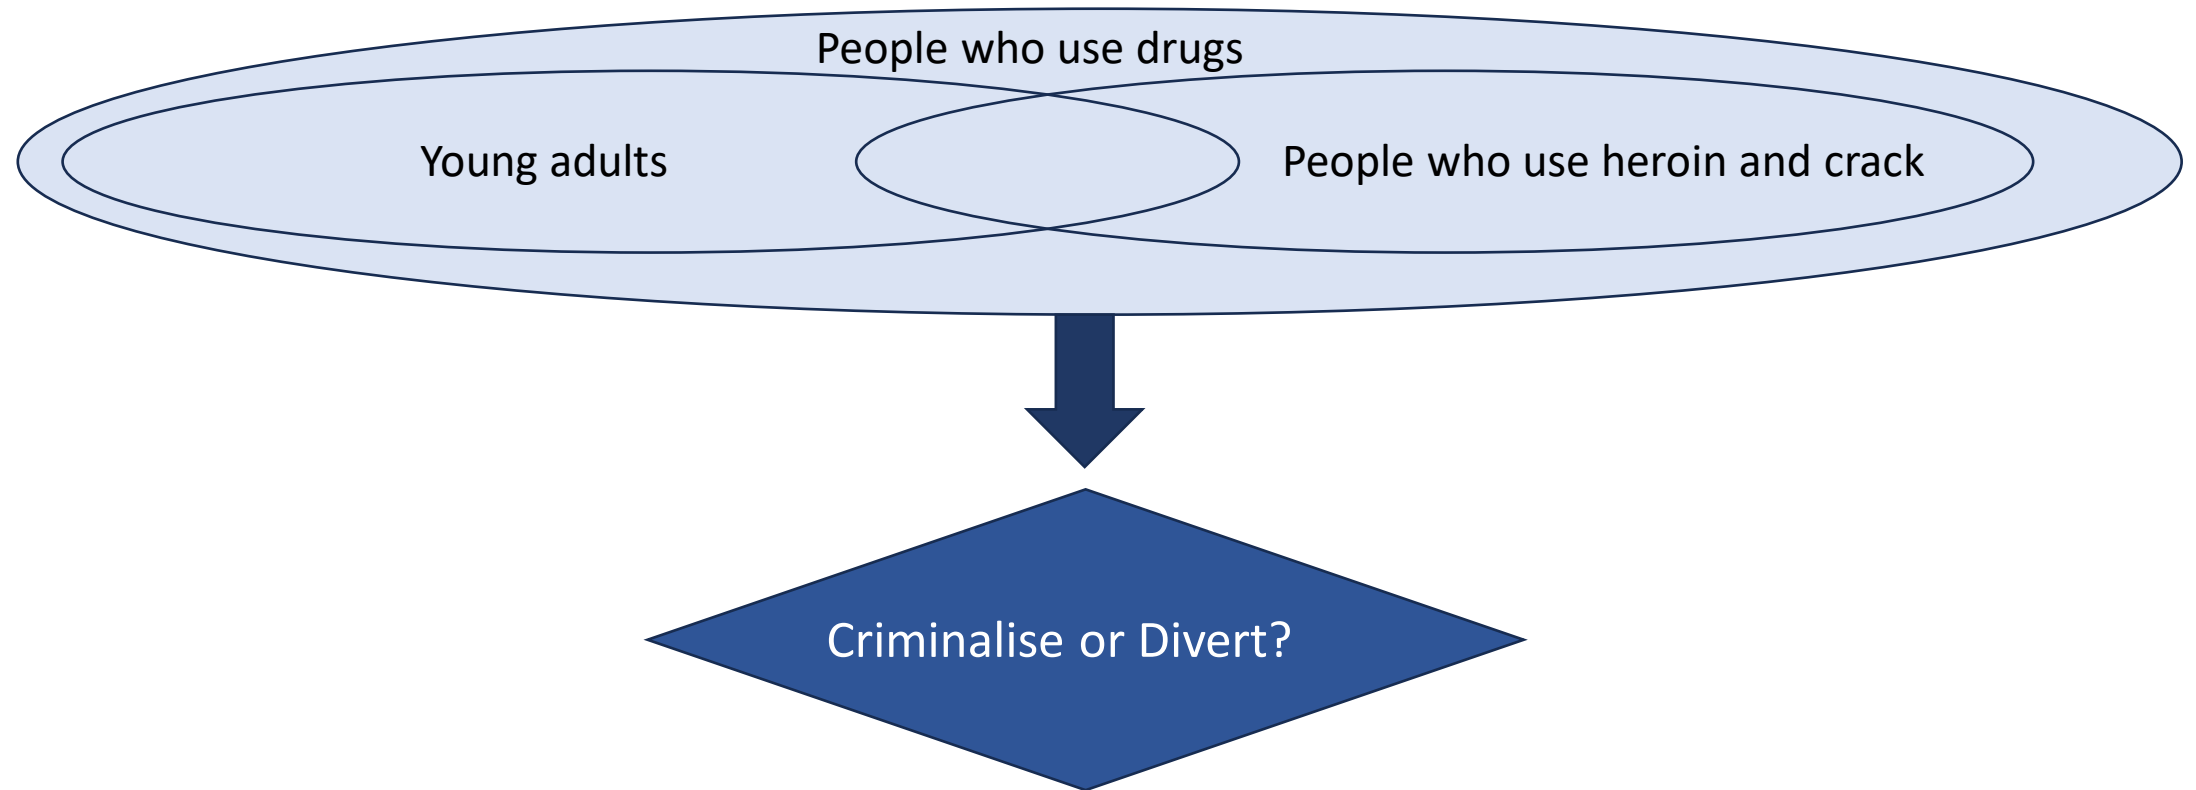

Contexts

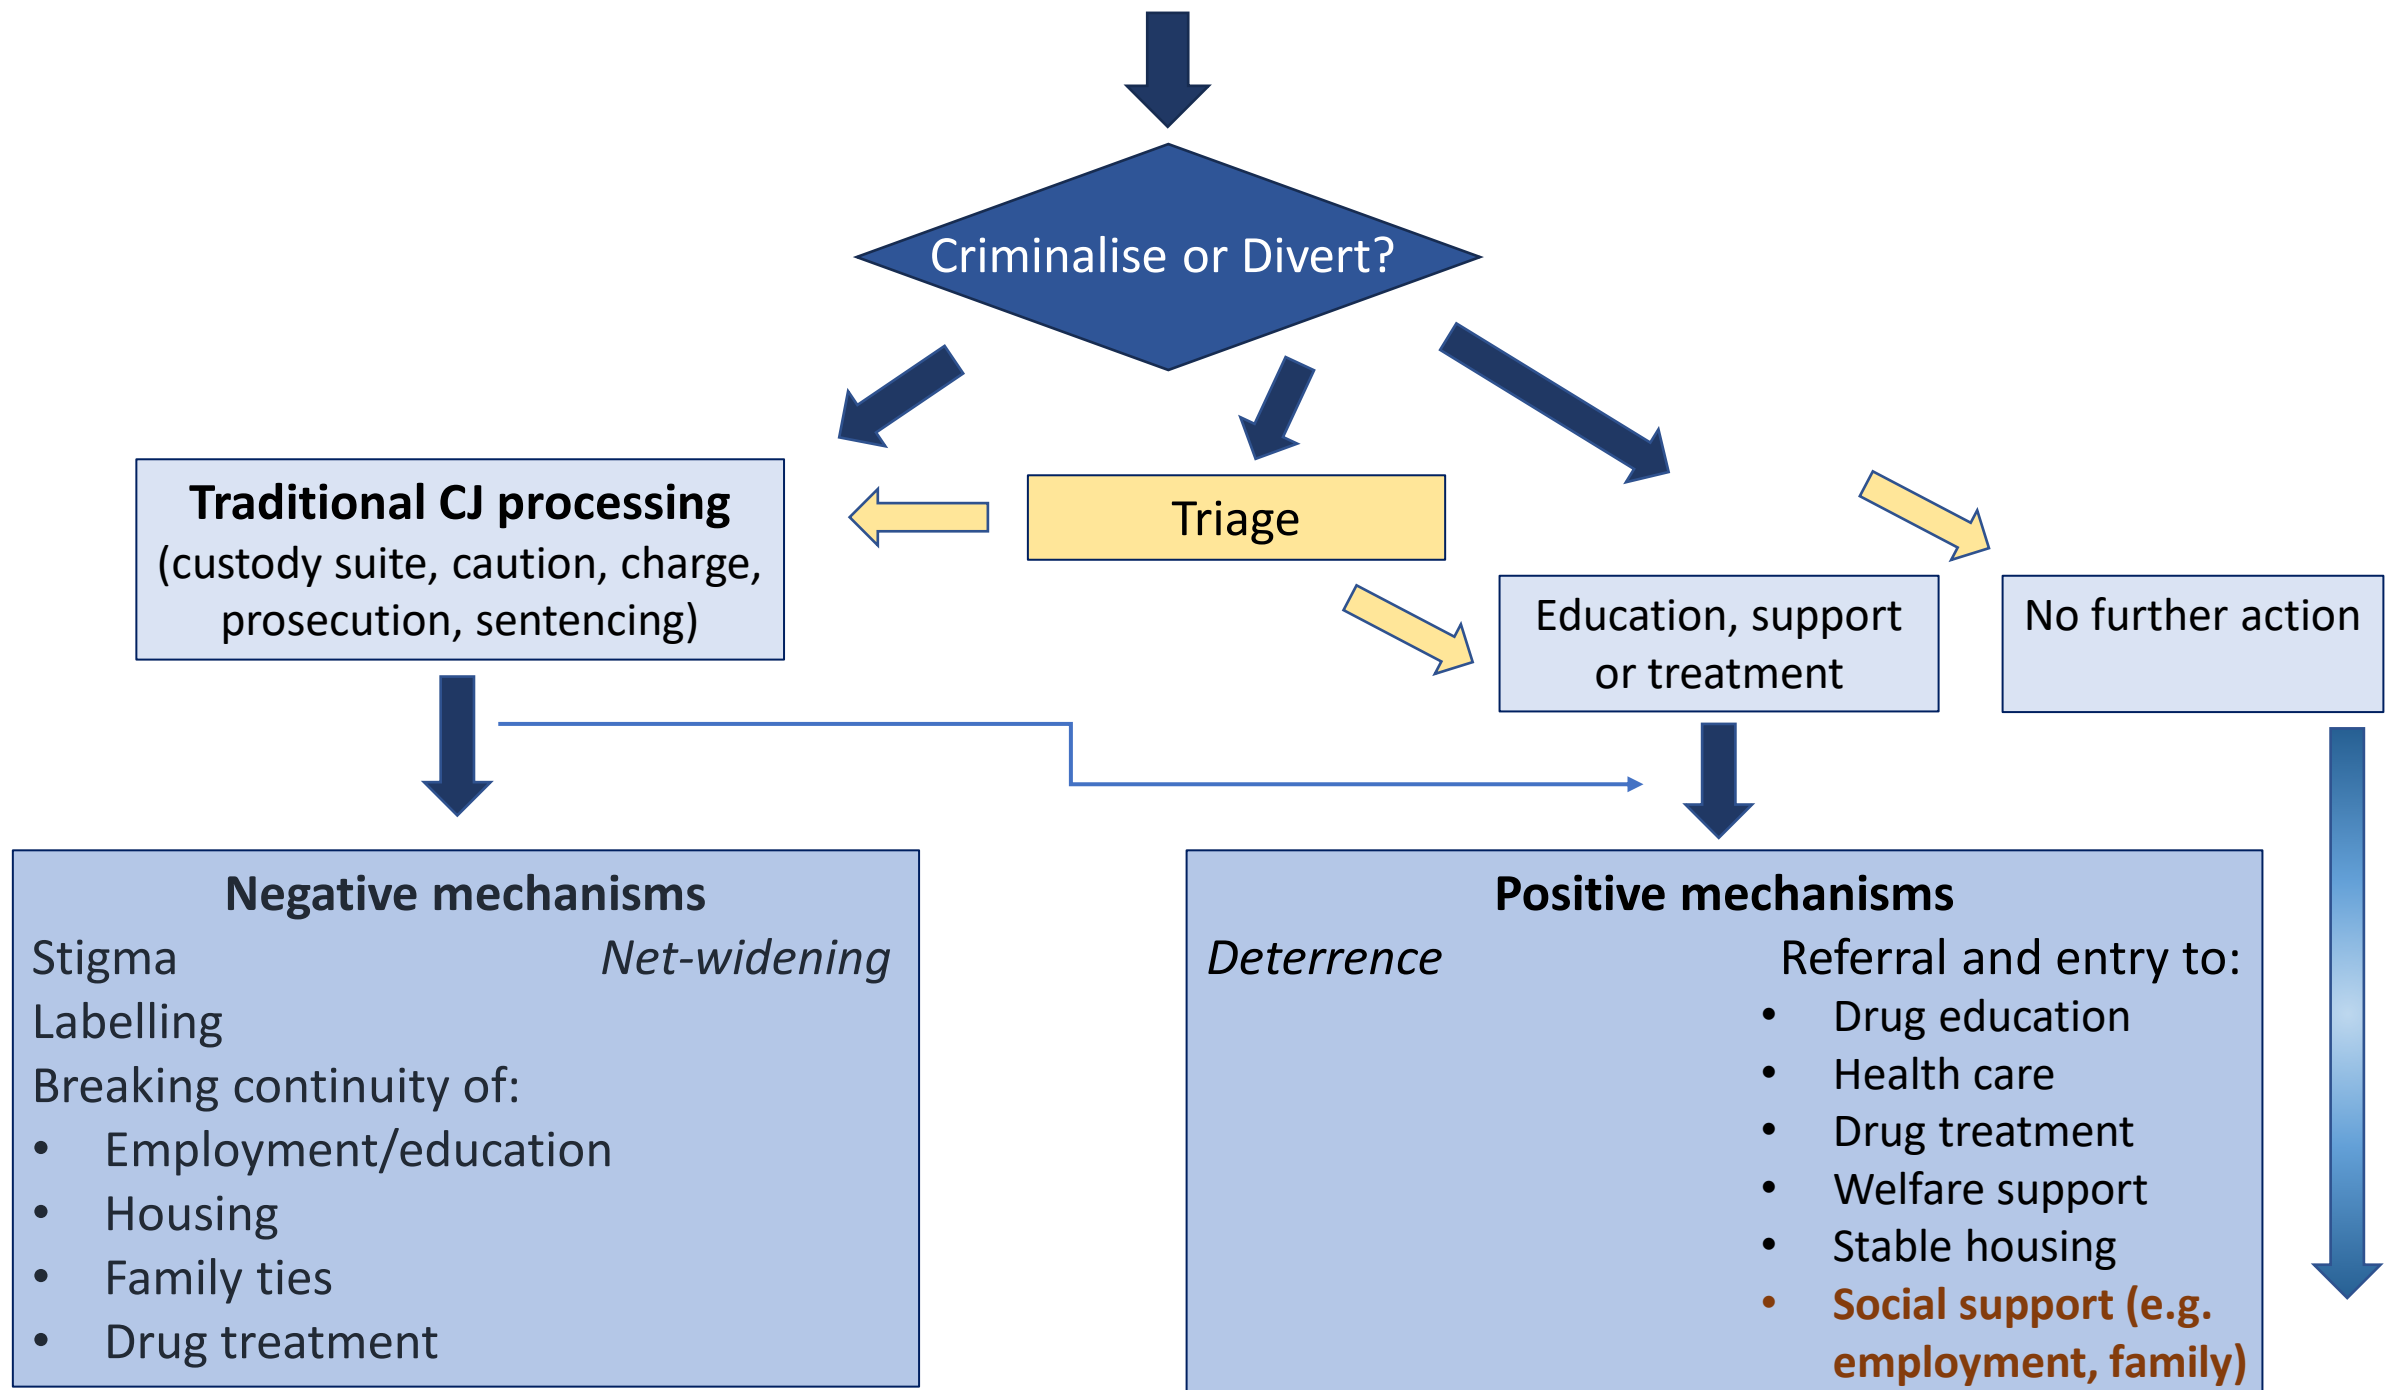

Area: health inequalities, crime opportunities **drug markets**, available treatment, urban/rural

Health service: primary care, drug treatment

Criminal Justice system: **police discretion, training, technologies (e.g. cameras, apps)**

Individual: **education, housing**, trauma/ACE, **exploitation, domestic violence**, previous record

Criminalise or Divert?

Traditional CJ processing
(custody suite, caution, charge, prosecution, sentencing)

Triage

Education, support or treatment

No further action

Negative mechanisms

Net-widening

Stigma
Labelling
Breaking continuity of:

- Employment/education
- Housing
- Family ties
- Drug treatment

Positive mechanisms

Deterrence

Referral and entry to:

- Drug education
- Health care
- Drug treatment
- Welfare support
- Stable housing
- **Social support (e.g. employment, family)**

CJ processing

Negative mechanisms

Diversion

Positive mechanisms

No further action

Moderators

Adherence/fidelity by police officers and other staff
Swiftness/certainty of sanction
Quality of services provided
Housing and employment

Persistence of contact
Motivation of offender
Peer effects

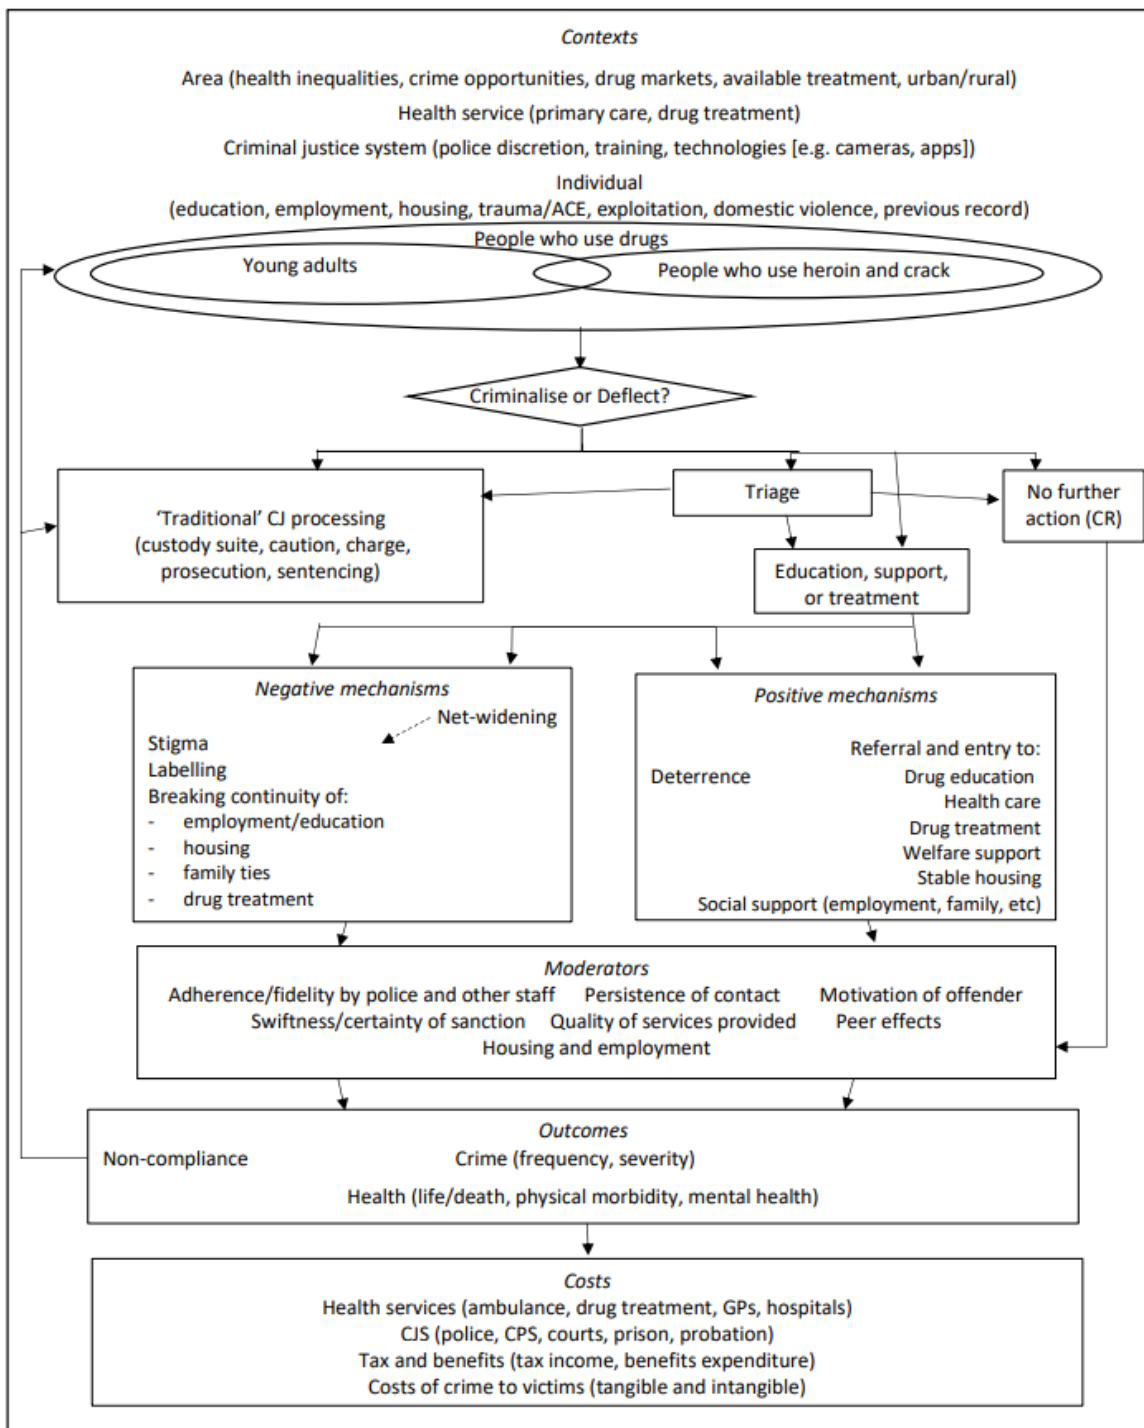

Outcomes

Non-compliance Health (life/death, physical morbidity, mental health)
Crime (frequency, severity)

Costs

Health services (ambulance, drug treatment, GPs, hospitals)
CJS (police, CPS, courts, prison, probation)
Tax and benefits (tax income, benefits expenditure)
Costs and crime to victims (tangible and intangible)

Where we are now ...

Completed

WP1: (finalise addendum)

Underway

WP2: Fieldwork - 225 planned (162 completed so far)
Coding – development of coding map using NVivo
Emerging themes

Workshop to discuss direction of analysis (February 2024)

WP3: Are now receiving police force data (control sites – for data linkage)

WP4- BAU costings and Intervention costs being considered and compiled

Next...

WP5: Aggregate data requests – from March 2024

WP6: Realist synthesis - Final stage

Final Report March 2025
