

CASE STUDY.

UNITEMPS

ZEAB THERAPEUTIC

A company whose mission is to undertake life science research for development of drugs and therapies for diseases.

BACKGROUND

Based at Discovery park alongside Canterbury Christ Church University's industry liaison labs, an academic colleague informed Unitemps that Zeab Therapeutic were seeking laboratory assistants to increase their testing capability, having expanded their offer during the covid-19 pandemic.

ACTION/ BENEFITS

Unitemps contacted Zeab Therapeutic about their business need, detailing the support available- in particular, the recruitment of sciences students with laboratory experience from Canterbury Christ Church University. Due to the uncertainty of future demand, it was crucial that staff employment dates could be easily amended and adapted from week to week. Given this requirement, Unitemps offered a flexible approach through their temporary staffing solution. Once agreed with the client, Unitemps began the recruitment and selection process, providing suitable students to the client prior to an onsite interview.

RESULTS

Unitemps provided two staff members with laboratory experience on variable hours contracts, enabling the business to develop their services and increase their capacity during a busy period. Additionally, it provided the students with fantastic industry experience, giving them an opportunity to apply their academic learning, increasing their employability skills and developing their career prospects.

'We have been very pleased with the two laboratory workers provided by Unitemps. One was so exceptional and made such a significant contribution to the business, we awarded him a certificate of excellence and hope he will join us on the completion of his degree.'
