KONAN WOMEN'S UNIVERSITY

Bespoke Nursing Vocabulary Training for Japanese Nurses

A meeting was held with visiting Faculty members from a Japanese University to plan a nursing vocabulary course for up to 20 Japanese nursing students. This developed into a tailor-made short course for these students that included Nurse Theory education sessions, practical experience in our Clinical Simulation Labs, talks by visiting nurse practitioners and a visit to a highly respected care home. Students had English Language tuition in the afternoon, and some time for cultural visits.

This flexible programme, based in the UK, can be completed on a full-time or part-time basis and includes the option to exit with a Postgraduate Diploma (PgD) or Postgraduate Certificate (PgC). It is also possible to undertake single modules as standalone elements.
